

MJP Fab.

Metal Jacketing Products

Technical Data Sheets

Fastening: Banding, Wing Seals, Fab Straps

Product Specifications

MJP's SST Fab Straps are produced in thickness' of 1/2" and 3/4" and available in either .015 or .020 depending on the spec. Fab Straps come pre-assembled with the wing seal and ready to install. These Fab straps are cut to various sizes to produce shorter install times on site. Our SST Fab straps are assembled from our banding rolls which are then folded over itself with a wing seal attached.

Product Specifications

The banding rolls and wing seals can be purchased separately to be manufactured on site. The full rolls of banding come in 1/2" .015 with a weight of 28lbs per roll or 3/4" .020 with a weight of 42lbs per roll. Alternatively, the banding can also come in 3/4" .020 oscillated in which each roll will vary per pound. Our wing seals are produced with a .032 durable stainless-steel material. These come in either 1/2" or 3/4" thickness.

Features

Standards: ASTM A240, A123
Gauge: .015, .020
Thickness: 1/2", 3/4"
Material: T304, T316, Galvanized Steel
Finishes: Soft Annealed Temper
